This is a file to test the DOCXtoPDF program.

DOCXtoPDF is written using Python, xtopdf and python-docx. xtopdf is written using Reportlab.

The purpose of DOCXtoPDF is to convert Microsoft Word 2007 (or later) files that are in .DOCX format to PDF format. The method used is to first extract the text from the DOCX file using python-docx, and then write that text to PDF using xtopdf.
